• Compositing
• VFX

Tailor-made for your requirements

Maximum flexibility and security with »zero-downtime« guaranteed

Capacity

- multiple Exabytes in a single filesystem
- start with as little as a few Terabyte

Speed

- multiple Gigabyte/s
- easily achieve over 3000 Megabyte/s per client

Scalability

- unlimited clients
- simply add Fibre Channel RAID arrays

Ideal components guarantee high-end performance

ELEMENTS SAN enables heterogeneous workflows to collaborate easily by sharing media files natively – across all platforms, fabrics and NLE and VFX applications, including Avid Media Composer and Adobe Premiere. Perfect for RAW/ high-res workflows or larger post-production houses and broadcast entities.

Tailored specifically to your expectations

Beyond meeting and exceeding the technical demands and requirements, such as multiple petabytes in one file system, ELEMENTS SAN solutions offer unique features such as support for expanding files in Avid Media Composer and full Avid project sharing and bin-locking capabilities.
